see without a microscope. All cells must come from pre-existing cells.

Biology 7.1 - Life is Cellular 2 | Biology Quiz - Quizizz

It is well known that life is cellular and only cellular: all tissues and organs of all animals and plants are organized assemblies of cells. Thus, we can consider the cell as the elemental constituent of life on this planet. Cells are (more or less) spherical structures, closed by a membrane, as illustrated by the simplified figure 2.
