1. Introduction. Human activity has significantly altered the global carbon cycle as land use change and fossil fuel burning have increased levels of CO 2 in the atmosphere, causing changes in our climate at an alarming and accelerating rate (IPCC, 1996, IPCC, 2001).Many factors play into the complex equation that determines the impact of greenhouse gas emissions on the concentration of these ...

Grid systems are critical to analyzing large spatial data sets, partitioning areas of the Earth into identifiable grid cells. With this in mind, Uber developed H3, our grid system for efficiently optimizing ride pricing and dispatch, for visualizing and exploring spatial data. H3 enables us to analyze geographic information to set dynamic ...
