in the order in which the cell cycle occurs. Use the diagram to answer questions 1-7.

\_\_\_\_ 1. Cells A & F show an early and a late stage of the same phase of the cell cycle.

## **THE CELL CYCLE WORKSHEET**

The cell cycle, or cell-division cycle, is the series of events that take place in a cell that cause it to divide into two daughter cells.

# Acces PDF Cell Cycle Labeling Answers

These events include the duplication of its DNA (DNA replication) and some of its organelles, and subsequently the partitioning of its cytoplasm and other components into two daughter cells in a process called cell division.
