Clipper, from Nantucket Corp and later Computer Associates, started out as a native code compiler for dBase III databases, and later evolved in to a full fledge database language and application development environment.

WinWorld: Clipper 5.x

All commands in CA-Clipper are defined using the `#command` directive and supplied in the standard header file, `std.ch`, located in the `\CLIP53\INCLUDE` directory. The syntax rules of `#command` and `#translate` facilitate the processing of all CA-Clipper and dBASE-style commands into expressions and function calls.
