Differential Equations With Maple V

Differential Equations with Maple V provides an introduction and discussion of topics typically covered in an undergraduate course in ordinary differential equations as well as some supplementary topics such as Laplace transforms, Fourier series, and partial differential equations. It also illustrates how Maple V is used to enhance the study of differential equations not only by eliminating the computational difficulties, but also by overcoming the visual limitations associated with the ...

the differential equation. Graphical methods are commonly employed in these discussions. The Maple command `DEplot`, from the `DEtools` package, provides a comprehensive interface for most graphical needs. To begin, consider the (linear) differential equation $\text{ODE} := \frac{\partial}{\partial x} () x$

Differential Equations in Maple

Integrating Maple V animation software and traditional topics of partial differential equations, this text discusses first and second-order differential equations, Sturm-Liouville eigenvalue problems, generalized Fourier series, the diffusion or heat equation and the wave equation in one and two spatial dimensions, the Laplace equation in two spatial dimensions, nonhomogenous versions of the diffusion and wave equations, and Laplace transform methods of solution.

Demonstrations of Using Maple in Calculus and Differential Equations In this second introductory section we will give demonstrations of how Maple can be used in calculus and differential equations. Later, as you work through some of the lab sections, it may be helpful to return to this section to see how some of the code in Maple is actually used.

3. Demonstrations of Using Maple in Calculus and ...

A differential equation can be entered in Maple using any of the methods for constructing algebraic, transcendental, or any other equation in Maple. It is a good idea to assign each differential equation to a unique, and descriptive, Maple name. Such assignments are typically done using an assignment statement.
