Currently, fine PM is the main cause of critical air pollution episodes in Tehran since, in recent years, it has exceeded the Iranian national ambient air quality standards (based on WHO guidelines which is 35 µg/m³) in more than one-third of the days (Roshani et al., 2018). The emission factors of the fine PM were estimated using the ...

A Compressor Dehumidifier is essentially like a little fridge and works by drawing in the air from the room which passes over a filter and then over cold coils (much like those on a refrigerator). As the coils cool the water condenses and drips into the water bucket within the unit, the air is then reheated to room tem
