The Version 5 and 6 EJ205 and EJ207 is a good motor, but it is over 15 years old now. It is considered reliable and will make around 250hp. Unfortunately, users have few tuning options on the stock ECU. Again, it will be difficult to pass emissions with one of these engines, due to the OBDII port that isn't compatible with typical scan tools.

Stage 2 with proper maintenance and no excessive abuse should also keep it alive long. My experience so far with ej207 motors has been good. The first motor I purchased was a ver 8, one never really know the exact miles on those imported junk yard motors but whatever it was I added 35,000 miles to before selling the car to a friend a few years ago.
