Environment of Decision Making. It is said that every manager's primary responsibility is decision-making. Managers follow a sequential set of steps to make good decisions that are in the interest of the firm. This process is known as decision making process.

### Decision Making Environment: Certainty, Uncertainty and Risk

Organizational environment denotes internal and external environmental factors influencing organizational activates and decision making. Every organization, whether business or non-business, has its environment. The organizational environment is always dynamic and ever-changing.

### Internal and External Environment Factors that Influences ...

In the context of environmental decision-making, efficiency can be interpreted as good process (rather than economic efficiency), and effectiveness as good outcomes. Ideally, if outcomes can be predicted with reasonable certainty, then good process should lead to good outcomes.

### Environmental Decision Making and Risk Management

Because of the complexity involved in understanding the environment, the choices made about environmental issues are often incomplete. In a perfect world, those who make environme

### Environmental Decision-Making in Context: A Toolbox

Contemporary environmental decisions are made within the context of sustainability aimed at meeting integrated ecological, economic and social goals. Most involve a complex mix of actors and institutions - differing values and differing interests. Choices are difficult and often controversial, and decision-making processes and contexts provide crucial influences on outcomes.

### Federation Press - Book: Environmental Decision-Making

Decision-Making in a Global Environment Managers advised to consider new economic variables Historically, political and social explanations for economic reality were typically distilled from prior experience, creating an economic worldview rooted in the past.

### Decision-Making in a Global Environment - A Peer-Reviewed ...

Good environmental decision making requires both improved understanding of human-environment interactions and improved understanding and management of decision-making processes. The research we recommend will complement past efforts in the former area with expanded effort in the latter, using a decision science approach.
