Subunit 02
Purpose/Background:

In this investigation you will determine the effect of pH on the rate of an enzyme-catalyzed reaction. Each simulated test tube contains the same enzyme solution. You will adjust the pH levels to collect the necessary data.

Enzyme Catalysis. by
Theresa Knapp

Holtzclaw. Introduction.
Enzymes catalyze reactions by lowering the activation energy necessary for a reaction to occur. In this laboratory, you will study some of the basic principles of molecular movement in solution and perform a series of activities to investigate these processes.
