First Steps in Research by Kobus Maree - Goodreads

Steps in conducting research Research is often conducted using the hourglass model structure of research. The hourglass model starts with a broad spectrum for research, focusing in on the required information through the method of the project (like the neck of the hourglass), then expands the research in the form of discussion and results.

Research - Wikipedia

The six steps of research Adopting the proposed model by Rummel and Ballaine (1963), there are six steps involved in the research process. These include identifying the area of study, choosing the topic, formulating a research plan, collecting and then analysing the data and then finally writing up the study.
