Our services also extend to South Africa, the Middle East, India and S. E. Asia

How To Make A Telescope

To make a telescope, start by wrapping a piece of 24 inch long corrugated paper around the diameter of a magnifying glass lens. Next, glue the paper into a tube shape and use scissors to cut 2 slots into it about 1 inch from each end. Then, place two magnifying glass lenses of different sizes into the slots and glue them into place.

How to Make a Telescope (with Pictures) - wikiHow

Make a telescope. Get crafty and build your own telescope to look for birds, treetops, and even stars in the night sky. If you want a better view of birds, treetops, or even the night sky, you and your family can build your own simple telescope.

Make a telescope - Kids

Since the tiny glass is noticeably tiny compared to your tubes' width, we're going to use the small cardboard to attach it to the tube. Put the back cardboard tube (the slightly less wide one) on the small cardboard and trace it out. Then, center your tiny magnifying glass on the circle you drew and trace it out.

Homemade Telescope : 10 Steps (with Pictures) - Instructables

Wrap the magnifying glass with the corrugated paper. Measure the diameter, if necessary, and mark it with a pencil. You can just make estimation with this but for an appropriate measurement, you can use something like a ruler to measure it. Pull the paper tightly.
