To install iTop on your web server, you must first download the latest release from Softpedia, save the archive somewhere on your computer, unzip it, open a FTP client application (e.g. gFTP or FileZilla), and copy the content of the 'web' directory from the outputted directory to the root of your web server, ...

Download iTop Linux 2.2.1

You could integrate both environments over the REST API. As long as they are loosely coupled, I don't see why an integration should be more than 100 lines in any language. I would suggest JRJC for jira and use cross-site scripting directly in ITOP to automate jira functions from ITOP.

How to integrate ITOP on JIRA?

@JulianTobon, Based on my research, all iTop data is stored in MySQL database, you can use MySQL connector in Power BI Desktop to connect to your source.
