Hash entry that is generated automatically by Windows to validate the integrity of file type association. ProgId entry is the Registered Application Id that handle the file type.. The main problem is that in recent versions of Windows 8/10 This key is protected by a hash associated with the file type, and succeeding in editing it without generating the valid hash the association is ...

Set File Type Association Default Application Command Line ...

I ended up mixing some solutions from here, because I am not using the HttpFileBase and only have the file stream, I had to read the first few bytes of the stream to determine the mime type. Note: I don't use the registry technique because I don't know what will or wont be installed on the servers.

Long story short, I am using the flow to convert docx files to pdf. The flow is looping back a 2nd time when the pdf file is created. If i can get the trigger condition to work, it will save me a 2nd flow run. The main issue is getting the file type, file extension recognized. How can I write the trigger condition expression to do what I need?
