2018 Guideline on the Management of Blood Cholesterol

ATP III Guidelines At-A-Glance Quick Desk Reference. Determine lipoprotein levels—obtain complete lipoprotein profile after 9- to 12-hour fast. ATP III Classification of LDL, Total, and HDL Cholesterol (mg/dL) Identify presence of clinical atherosclerotic disease that confers high risk for coronary heart disease (CHD) events (CHD risk equivalent): Clinical CHD.

ATP III Guidelines At-A-Glance Quick Desk Reference

Another notable change, according to Dr. Nissen, is that the new guidelines bring back the notion that lower levels of low-density lipoprotein (LDL) cholesterol are desirable and should be targeted and measured. LDL is a major cause of coronary artery disease and is the culprit behind most troublesome cholesterol buildup in the arteries.

New Cholesterol Guidelines Emphasize Lowering LDL Levels ...

However, once there is atherosclerotic cardiovascular disease (plaque in the arteries), the new guidelines recommend that high-intensity statin therapy or maximally tolerated statin therapy should be used, in addition to lifestyle modification, to reduce low-density lipoprotein cholesterol (LDL-C).
