They also have over one hundred different special collections ranging from American Lit to Western Philosophy. Worth a look.

Notodontidae Oenosandridae Lepidoptera

Notodontidae is a family of moths with approximately 3,800 known species. The family was described by James Francis Stephens in 1829. Moths of this family are found in all parts of the world, but they are most concentrated in tropical areas, especially in the New World (Miller, 1992). The Thaumetopoeidae (processionary moths) are sometimes included here as a subfamily.
