Minerals, Rocks, and Soil. Earth is made up various living and nonliving materials. Elements form minerals, and minerals form rocks. Different rock types - igneous, sedimentary, and metamorphic - transform at various points in the rock cycle. Through the processes of weathering and erosion, rocks change, break, and move.

Science A-Z Minerals, Rocks, & Soil Grades 3-4 Science Unit

Take three different samples of soil. One should be a sample of very sandy soil, the second a sample of fertile soil, and the third one a sample of hard, clay-like soil. Put one of the samples in a strainer and hold it over a pan. Pour water over the soil sample to see how well it absorbs the water.
