The 5th edition is very similar to the 4th edition, only it has been updated to follow the AISC 13th edition steel design specification. In keeping with the combined nature of the 13th edition code, there are examples in both ASD and LRFD design philosophies. Definitely not the best textbook to use for a structural steel design class. Too many steps are skipped in example problems and there's barely any references to the AISC Steel Manual when solving problems. Unless your instructor is crystal clear in conveying the material, then this textbook is (almost) useless.
